

# Phyton Biotech®

## Specialized CDMO using Advanced Fermentation Technology to produce Hard-to-Source Active Compounds.

### UPSTREAM CDMO (GERMANY) Tailored Fermentation Solutions

At our Ahrensburg, Germany location, we provide tailored fermentation development and scaling services including:

#### Plant Cell Fermentation Applications

- API's, Vaccines (Adjuvants), Traditional Chinese Herbal Medicine, Regenerative Medicine
  - Cosmetics, Food & Nutrition, Agriculture, Textiles

#### Unique Fermentation Strains

#### Commercial GMP Fermentation for Specialized Strains:

- Large Scale: > 195,000L
- 2 x 75,000L • 1 x 45,000L
- Pilot Scale: 16L – 7,500L

With 25+ years of experience, our facility reliably supplies fermentation-based starting materials for Paclitaxel and Docetaxel APIs.

### DOWNSTREAM CDMO (CANADA) Purification and Chemistry

With 25,000+ square feet of GMP commercial space in Vancouver, Canada, our downstream facility is ready to produce your active compound.

- GMP Commercial API Manufacturing
- Controlled Drugs and Substances License
- Complex Chemistry on Isolated Active Ingredients from Fermentation or Natural Extraction
- Small Molecule and Protein Purification
- Process Development Capabilities
- Tailored Downstream Processing Suites
  - US FDA and Health Canada Inspected/Approved
